

Features for SafeSight

1. Display (screen)
 - Display visual warnings
 - Provide visuals (model) of cars behind and in the blindspot
2. Audio and haptic alerts
3. Basic parking assistance
 - Change the display on the screen to the rear view camera, and some basic warnings on distance from other objects
 - Dynamic guide lines
4. Collision warning
 - Ex: You are getting too close to vehicle without enough braking, so it will alert you to brake more
 - log any potential crashes and license plates
5. Lane departure warning
 - Continuously checks distance from each lane marker and alerts you when the distance starts gradually changing (not a lane change)
6. Blind spot detection
7. Approaching vehicle speed estimation
 - Estimates how far a car is coming to judge whether they are going dangerously fast
8. Real time edge processing
